High Frequency High Voltage Transformer for IEC 60601-2-2 and IEC 60601-2-18 Compliance Testing

We manufacture low stray capacitance, high frequency and high voltage transformers for test labs working with IEC 60601-2-2 (HF surgical equipment), and IEC 60601-2-18 (endoscopes using HF insulation) compliance testings.

Model Number: AL-T75-IEC 60601-2

Primary Volts: 25 V rms. (unless otherwise specified)
Secondary Volts: 1200 V rms.
Frequency Response: 300K Hz to 500K Hz
Output Power: 75 watts

Price: \$895.00 (including a metal box with input terminals and high voltage output terminals)

Standard Lead time – 3 weeks from receipt of order

Expedited Lead Time – 1 week from receipt of order (An additional 15% of expedited fee will be applied.)

Note: We assume you have a power amplifier to drive this high frequency high voltage transformer. If you don't, you can consider our standard model AL-100-HF-A wideband power amplifier. Please click [HERE](#) for details.
