MODEL AL-300-CV/S CONSTANT VOLTAGE SOURCES

The model AL-300-CV/S power sources are wideband, full complimentary class AB linear programmable power supplies. The output frequency is adjustable from 47 Hz to 10K Hz. They are widely used in manufacturing industries and research laboratories where audio frequencies are needed for special testing. Applications include plasma excitation, induction heating, magnetic field generation and testing products such as Helmholtz coils, piezo elements, inductors, capacitors, etc. In addition to the basic model, we offer purchase options for users to control the output parameters by: (1) 0-10V DC control signal; (2) RS232 commands; (3) GPIB commands.
